

The graph displays the accumulated profit for various agents over 50 episodes. The y-axis represents the accumulated profit, and the x-axis represents the episode number from 0 to 50. The legend identifies the following series:

- Agent 1 Accumulated Profit (Blue line with circles)
- Agent 2 Accumulated Profit (Orange line with circles)
- Default Agent 0 Accumulated Profit (Green line with circles)
- Default Agent 1 Accumulated Profit (Red line with circles)
- Default Agent 2 Accumulated Profit (Purple line with circles)
- Default Agent 3 Accumulated Profit (Brown line with circles)
- Default Agent 4 Accumulated Profit (Pink line with circles)
- Random Agent 0 Accumulated Profit (Grey line with circles)
- Random Agent 1 Accumulated Profit (Yellow line with circles)
- Random Agent 2 Accumulated Profit (Cyan line with circles)
- Random Agent 3 Accumulated Profit (Dark Blue line with circles)
- Random Agent 4 Accumulated Profit (Light Orange line with circles)
- Random Agent 5 Accumulated Profit (Pink line with circles)

The Default Agent 0 series shows the highest accumulated profit, starting around 20 and ending near 45. The Random Agent 5 series shows the lowest accumulated profit, starting around 15 and ending near 5. The other agents show intermediate performance, with Random Agent 1 and Random Agent 2 performing relatively well, and Default Agent 4 performing the worst among the default agents.
