

The figure displays a time series plot with a blue line. The x-axis is labeled from 0 to 1000 in increments of 200. The y-axis is labeled from -10 to 10 in increments of 2. The series exhibits high volatility and a clear upward trend. It starts near 0, drops to -10 around x=50, and then generally increases with significant fluctuations, reaching a peak near 10 around x=850 before ending near 0 at x=1000.
