

The graph displays the Value Loss for ten different agents over a period of 1.5 epochs. The y-axis, labeled 'Value Loss', ranges from 0.0 to 1.6. The x-axis, labeled 'Epoch', ranges from 0.0 to 1.5. The legend identifies the agents by color: Agent 0 (blue), Agent 1 (orange), Agent 2 (green), Agent 3 (red), Agent 4 (purple), Agent 5 (brown), Agent 6 (pink), Agent 7 (grey), Agent 8 (olive), and Agent 9 (cyan). All agents exhibit a similar overall trend, with their value loss increasing from approximately 0.1 at epoch 0.0 to a plateau near 1.5 by epoch 1.0. There are some fluctuations, such as a dip for Agent 3 around epoch 0.85 and Agent 1 around epoch 0.95, but the general upward trajectory is consistent across all agents.
